

A CREE-DRIVEN PROJECT TO UNDERSTAND COASTAL ECOSYSTEM CHANGES IN EYYOU ISTCHEE

COASTAL HABITAT
COMPREHENSIVE
RESEARCH PROJECT

RESEARCH

Combine Eeyou knowledge & Western Science to understand:

How are coastal waters changing? Can eelgrass adapt or recover?

MONITORING

We will regularly measure water quality and eelgrass to better understand where and how the ecosystem is changing

HOW ARE COASTAL CHANGES AFFECTING EELGRASS?

ACTION PLAN

Work towards eelgrass restoration by:

- Stabilizing the sediment to improve water clarity
- Transplanting eelgrass

Support local Eeyou capacity by:

- Co-developing monitoring protocols
- Sharing knowledge & provide training opportunities
- Involving youth
