

EYOU-DRIVEN WILDLIFE MONITORING IN COASTAL EYOU ISTCHEE

COASTAL HABITAT
COMPREHENSIVE
RESEARCH PROJECT

RESEARCH

How are nisk
& other wildlife
changing? Why?

How can Eeyou Knowledge
and Western Science be
woven to better
understand
changes in
wildlife?

TO PRESERVE NISK & OTHER
WILDLIFE FOR THE FUTURE

MONITORING

Eeyouch and
scientists are working
together to monitor:

- Goose health,
abundance, distribution,
and behaviour
- Changes in other
wildlife

ACTION PLAN

Learn about
wildlife location, timing,
abundance, and health by
using non-invasive tools
like drones, harvest
measurements, cameras,
sound recorders, etc.

Support local
Eeyou capacity by:

- Co-developing
monitoring protocols
- Sharing knowledge
& provide training
opportunities
- Involving youth
